

customer conversation release notes August 2022

Your Corporate Visions subscription includes automatic access to current research, new products, new releases, and product updates.

Maximize the value of your subscription by keeping it current with these recently released upgrades. Major announcements are highlighted below, with product-specific details on the following pages.

Expand Value Skills digital redesign

A totally new active learning experience focused on skills development and behavior change.

The Expand Value Skills concepts and intellectual property remain unchanged—but the digital modules have been completely reimagined and upgraded. Digital modules now include a rich variety of media and modalities to improve the learning experience and retention. This includes videos, animations, engaging visuals, and learner interactions. Of special note are videos of CVI consultants sharing stories and key learnings that bring the Expand Value experience to life.

New practice modules and video simulations improve retention and application.

The Inline experience has been upgraded with new practice modules at the end of each section of the course. Learners practice their new skills within simulated situations that prepare them to apply the skills to their own accounts. Also brand new, is a simulation for each decision that presents video scenarios where learners practice taking part in Why Evolve and Why Stay conversations with customers.

Take a look at this [sneak peek video](#).

Redesigned Inline workbook connects the learning experience to real-life skills and customer application.

The Inline experience also integrates the interactive workbook into the daily learning experience. Each day ends with the learner completing workbook activities to apply the new concepts and skills to one of their own accounts.

Expand Value Instructor-led redesign

Restructured instructor-led experience aligned with the new digital experience

The instructor-led agendas have been updated and reorganized to align with the flow of the Inline experience. Core concepts like the Messaging Void and Triple Metric have been moved to the workshop opening; Why Stay now comes before Why Evolve. One of the new digital simulations has been included as the day-1 concept review.

Skills Reinforcement for Customer Success

Drive skills adoption through timed reinforcement

Each customer success program is now supported by a timed email campaign linked to Mini-booster reinforcement modules. These modules reinforce key skills concepts with knowledge checks and reinforcement activities.

Coaching for Customer Success Leaders

Drive skills adoption through effective coaching.

You now have access to skills coaching workshops for the Customer Success suite: Create Success, Elevate Success, and Expand Success. The Coaching for Customer Success Leaders workshops focus manager coaching on 3 key concepts from the underlying skills workshop, along with a repeatable, consistent model for every coaching interaction. New materials include leader slides, leader guide, coaching workbook, job aid, and coaching kits.

Ongoing Change Log

It's never been easier to see what's new and updated.

A reminder, that as of April 15, 2021, an ongoing log of file updates to the Subscriber Portal is being maintained to give you visibility into the latest file updates. The log includes update recommendations, flags new content, and highlights whether the update is recommended or optional. Also included are the date the file was updated (month/date/year), and a description of the updates included. If there is no date following the file name it is the most current file available. You can view all [Product Updates](#) like this one in the CVI Subscriber Portal. You can directly access the detailed [Product Change Log](#).
